Halobenzoquinone Standards (disinfectant by-products) NEW

Halobenzoquinones (HBQs) are disinfection by-products formed by reactions between disinfectants and organic matter in water. HBQs likely exhibit carcinogenic properties due to their structural similarities with benzoquinone and related compounds.

Halobenzoquinones		All in 10 µg/mL in AcCN		
Compound	CAS	Cat. No.	Unit	
2,3-Dibromo-5,6-dimethyl-1,4-benzoquinone	38969-08-3	HBQ-001S	1 mL	
2,6-Dichloro-1,4-benzoquinone	697-91-6	HBQ-002S	1 mL

Imidazole Standards (caramel coloring) NEW

Over the past several years, there has been increased scrutiny of the caramel coloring used in food products, particularly cola-type soft drinks. There is concern of 4-methyl imidazole (4-MEI) that is created during the caramel coloring synthesis process. The concern arises because 4-MEI has been reported to be carcinogenic in high doses.

Bisphenol Analog Standards UPDATED

Bisphenol A (2,2'-bis(4-hydroxyphenyl)propane, BPA) has been used in commercial and industrial applications since the 1970's. It has been the subject of numerous toxicological studies due to human exposure from leachate originating from polycarbonate plastics and epoxy-lined food and drink containers. Analogs of BPA have been the subject of recent health-related studies.

Neonicotinoids and Fipronils (CCD) **UPDATED**

On-going research into honeybee colony collapse disorder (CCD) has revealed that this group of pesticides may be a contributing factor. There are several possibilities. Any one of which may be solely responsible or working synergistically contributing to honeybee decline. Included in this group are the **Neonicotinoid pesticides**. **Fipronil and Fipronil metabolites** also have been suspected as possible causative agents.

Phthalates **UPDATED**

The Consumer Products Safety Commission (CPSC) has proposed banning the use of several phthalates in materials for children's toys. In 2008, Congress banned dibutyl, n-butyl benzyl and di-2-ethyl hexyl (DEHP) phthalates as potential health risks.

Diisononyl (DINP), di-n-octyl (DNOP) and diisodecyl (DIDP) phthalates also were banned on an interim basis. CPSC's advisory panel now recommends a permanent ban on DINP, but says the ban on DNOP and DIDP should be lifted. In addition, the panel wants to ban diisobutyl, di-n-pentyl, di-n-hexyl and dicyclohexyl phthalates.

AccuStandard offers a comprehensive inventory of Congress and CPSC banned phthalates. Also available are a number of mono-phthalate metabolites. Please check our website for a complete listing of these plasticizers.
